

Product Name AeroLuxe | Bladeless Ceiling Fan with Dimmable LED Light

Style Modern / Minimal

Power Supply Hardwired

A ceiling fan with the blades enclosed inside the housing, so there is nothing exposed overhead. It moves air steadily rather than forcefully, which suits bedrooms and children's rooms.

Two mounting styles — a low-profile flush mount for standard ceilings, or a pendant drop where there is height to use.

An inverter motor keeps it quiet at low speed, and the built-in LED dims from 3000K to 6000K on the remote.
