

Product Name BambooGlow | Woven Bamboo Japanese Table Lamp, E27

Style Japanese / Natural

Power Supply Plug-in, AU Type I

A woven bamboo shade over a cylindrical inner diffuser. The bamboo layer breaks the light into fine vertical lines and the diffuser stops it glaring through the gaps.

A traditional lantern silhouette, in natural bamboo, singly or in sets of two or four.

Plugs straight into an Australian socket with a 3000K warm white globe already fitted — nothing to install, nothing to buy.

Specifications & Quality Documentation

Dimensions, materials, electrical detail and installation requirements for this fixture.
